Naming ionic compounds worksheet 2

Continue

This bundle contains 2 Power Points, and 20 pages of multiple choice questions on naming compounds. They are suitable to use for a grade 10 science or grade 11 chemistry course and combined are 58 pages long.The topics include naming ionic compounds, naming covalent compounds, predicting formulas of ionic compounds, crisscross rule, predicting formulas for covalent compounds, naming binary acids, naming oxy acids, naming polyatomic compounds, naming hydrates, naming hydrides, IUPAC naming, namiPage 2Unit menus, differentiation, student-centered learning, student-choice, asynchronous learning, technology integration, ionic compounds, ionic bonding, nomenclature, properties of ionic compounds, modelingInspire your students to take ownership over learning through choice! Unit menus allow your students to take responsibility for their learning by selecting their own modality and/or assessment. If you are looking to incorporate asynchronous learning and differentiation into your classroom cultPage 3Use this resource for teaching supplement and notes over writing chemical formulas for binary ionic compounds. More interactive and fun than a traditional notes. Differentiated versions are included. Check out the preview for a complete view of the download. Keywords: science, chemistry, physical science, atom, bond, intramolecular force, ionic bond, ionic compound, metal, nonmetal, cation, anion, oxidation state, ionic symbol, subscript, superscript, ion, chemical formula, doodle notes,Page 4Whether identifying the net ionic equation, the precipitate, or spectator ions, this no-prep, in print and digital Google Apps format, activity engages students with practice over net ionic equations while also providing space for work, a way to self-check, & the reveal of a colored tangram (brain break!) . Perfect as an assessment tool, a group assignment, a homework assignment, or for early finishers. A list of solubility rules also included.Tangram addresses the following topics:net ionicPage 5Use this resource for reviewing or assessing your students' understanding of naming and writing chemical formulas of binary and tertiary ionic compounds. Choose from 3 different versions (simple, intermediate, and advanced) or use them to differentiate to meet individual needs of your students. Check out the preview for a complete view of the download. Keywords: science, chemistry, physical science, atom, bond, intramolecular force, ionic bond, ionic compound, metal, nonmetal, cation, anioPage 6This no-prep product includes all of the notes (guided and teacher), practice, and quizzes you need to teach ionic & covalent bonding to your chemistry, physical science, and HONORS physical science classes. Content covered includes binary ionic bonding, covalent bonding, & polyatomic bonding. ANSWER KEYS TO ALL worksheets and task cards are included. The following resources are included in this bundle: - Ionic bonding notes, practice, and task cards; - Covalent bonding notes, practiPage 7Ionic and Covalent Bonding Webquestby This webquest is meant as an introduction to ionic and covalent bonding in chemistry. The assignment works through valence electrons, the octet rule, the transfer or sharing of electrons, and the properties of ionic and molecular compounds based on their bonds.IONIC BONDING UNITby { Ionic Bonding Counting Atoms Reading and Writing Chemical Formula Worksheets Activities }Here is a must have package for teaching all about ionic bonding in middle school science. The package begins building understanding around the patterns between valence electrons and combining capacity. It reviews counting atoms and then provides a comprehensive experience in reading and writing compound formulas. Two games are included as well which are sure to engage your students. The package includHello!The purchase of this bundled product grants the purchase of three (3) DIGITAL (Google Forms) Assessments with twenty-five (25) problems EACH (so seventy-five (75)) fill-in-the-blank questions problems total between the 3 Google Forms) on the nomenclature of transition metal ionic compounds.Goals of this Digital Assessment: For students to use this as a tool to study & practice chemical nomenclature & eventually master the skills of:Nomenclature of transition metal ionic compounds.TNaming Compounds Task Card BUNDLE (Ionic and Covalent)by Your kids need to practice, but worksheets have them bored to tears. These two task card decks are designed to work together. Mix and match from both decks so your kids can practice naming and writing formulas for ionic and covalent compounds during the same activity. The possibilities are endless. Just copy, laminate, and cut and these versatile cards will add variety and engagement to your classroom for years to come. Using Task CardsThis task card bundle includes two decks each with 36 nameLooking for a fun way to bring the Madness of March into your chemistry classroom?! Look no further! This BUNDLE of brackets helps students review writing ionic and covalent formulas, identifying polyatomic ions, and finding molar mass. Includes a directions and the "rules" for each round of "Chemistry Formula Madness". Teacher answer key is included!Still teaching online and also in the classroom? Want a product that can easily work for both teaching methods? This resource has BOTH a remote leaThis worksheet requires the student to:1. Determine the unknown charge of transition metal cations in ionic compounds by using the known charge of their anion.2. Name the ionic compound using correct Roman Numeral nomenclature.3. Additionally, it requires them to focus on the charge of the cation in order to solve a riddle.This worksheet comes with an abridged periodic table, a fun riddle, and an answer key.Enjoy!Are you looking for a fun way to have your students review predicting formulas for binary ionic compounds? Your students will LOVE this activity! This game has students work in pairs & take turns rolling dice to answer questions. The object is to get 5 correct answers in a row (vertically, diagonally, or horizontally) to win the game. Your download will include: -directions -game board -answer key Special materials needed: dice & bingo chips (or other markers of some sort) Other partnIonic Compound Practice Activityby This ionic compound scavenger hunt is an easy, no prep (print and go!) loop activity that will lead your students around your classroom finding ionic compounds and names. Students will solve the problem at one station, then go on a hunt to find their answer at another station. If the student has completed each problem correctly, they will complete the loop by finding the answer to their last problem at their starting station. To complete this activity, students should have some experience findiThis is a bundled product that covers both the structure and properties of ionic and covalent bonds.Please look at the individual resources in the bundle for further details, product previews, and advice on whether the product is right for you!If you are teaching a general chemistry class with multiple academic levels present (SPED, ELA, mainstream, gifted and talented), this resource is a great addition to your curriculum. This resource is unique in that it offers instruction that is not only sThis printable AP Chemistry Worksheet Bundle contains sets of carefully selected high-quality & auto-grading multiple-choice questions on Unit 2 - Molecular and Ionic Compound Structure and Properties. Each worksheet gives you a great printable resource to assign to your students for homework, classwork, practice, or review for a quiz, test, or exam. My resources follow the New AP Chemistry Course Framework.This bundle has over 150 quality multiple-choice questions on the following topics ofIonic and Covalent Bonding by The Witty Science TeacherProduct DescriptionThis chemistry hyperdoc teachers students all about ionic and covalent bonding. They will read an article about bonds and the process for each one. They will watch a video to learn about each bond. Last, they will use images to try to identify and explain if the bonds are ionic or covalent. Early finishers will review ionic and covalent bonds with a Bill Nye Video where they write 5 facts from the video. Bundle OptionAlso included in my Chemistry Hyperdoc Bundle.Bundle PrevieForming Ionic Compounds [Cut-Out Activity]by Forming Ionic Compounds [Cut-Out Activity]Click the green View Preview button for a full preview of this worksheet.Cut-and-paste task using shapes to model how formulas for ionic compounds are derived.Covers all valency combinations and includes tables to complete.Includes teacher version containing instructions and complete answers.This resource is included in the Year 9 Chemistry Workbook (Australian Curriculum), which contains the following worksheets:Atomic StructureAtoms in Elements and ComSubjects:Types:Practicing net ionic equations? This no-prep, self-monitoring, print, and digital activity provides practice writing net ionic equations, applying solubility rules, and identifying spectator ions in an engaging way. This “choose your own adventure” activity gives you time to help those who need it as students self-monitor their work. Additional Google slide decks allow you to edit the printable and digital question trails.Included in these files:Print Version10 questions covering writing net ionPage 8Teaching net ionic equations and solubility? Turn net ionic equations worksheet practice into application with this editable, self-checking net ionic equations lab. In print and digital Google Apps format, this activity has engaging practice over solubility rules, spectator ions, and net ionic equations. The lab handout, solubility rules, reaction plate, and digital self-grading Google form are editable to fit your needs and are perfect for in-person, absent students, and/or distance learning. GPage 9Teach students about concepts related to chemical bonding such as finding ions, creating electron dot diagrams, determining chemical formulas, and covalent and ionic bonding using the included teacher presentation, printable worksheets, and digital Google Slides activities. This chemical bonding activity includes science text for students to learn about bonding, worksheets to practice making bonds, comprehension questions to assess knowledge, and graphic organizers to summarize information. StudPage 10Bonding - Covalent and Ionic Animationsby Here are three "fast-draw" animations showing covalent bonding in methane and ionic bonding in NaCl. I've also included "A Chemical Romance", my free download, a tongue in cheek look at the love story that was never told between Na (a small town boy) and Cl (a posh girl from the famous Halogen family). It's a very visual way of engaging the learner. It's great for complimenting your existing resources and introducing the student to covalent and ionic bonding in a fun and exciting way."My 7th graIn this activity, students will answer 16 questions about Ionic, Covalent, & Polyatomic Bonds. The questions include properties, naming, & formula writing. The students will use the answers to color the corresponding parts of a Halloween coloring page. The following are included in this resource:- Blank Color by number template - 16 practice questions - Color by number answer keyYou may also like my:***Physical Science Color by Number BUNDLE***Physical Science Task Card BUNDLE***PleasUse this bundle of my top selling coloring sheets for your chemistry classroom. These 9 worksheets teach so much and the students enjoy them too. After they color them, these sheets make excellent reference sheets for the students to keep in their notebooks. The cation and anion worksheet is differentiated so that you can use it two ways depending on which level your students are at.~~~~~~Please Help My Store ImproveI Love Hearing Your Feedback• PReady-to-go Google Slide activity that will have students using their knowledge of naming and formula writing for binary ionic compounds, ionic compounds with multiple charges, and ionic compounds with polyatomic ions. This product includes:Lesson SlidesStudent Notes SlidesStudent Practice SlidesAnswer Key SlidesPage 11This product contains 18 pages of chemistry multiple choice questions on, ionic, covalent and metallic bonding. The topics include using electronegativities to predict the type of bond, non-polar covalent bonds, polar covalent bonds, ionic bonds and metallic bonds, molecular compounds, diatomic molecules, valence electrons, octet rule, full octet, bonding capacity, properties of non-polar covalent compounds, properties of polar covalent compounds, properties of ionic compounds, properties of mePage 12This unit includes atoms, elements, compounds, ionic bonds, covalent bonds, properties of water, macromolecules (structure, function, examples, CHONP), dehydration, hydrolysis, monomers, polymers, reactants/products, enzymes, and activation energy.Page 13Use this resource for reviewing or assessing your students' understanding of how to name ionic, covalent, and acidic compounds. Perfect resource for classwork, homework, or as a emergency sub plan. Check out the preview for a complete view of the resource. Keywords: science, chemistry, physical science, nomenclature, ionic compound, covalent compound, acidic compound, acid, metal, nonmetal, ide, binary acid, oxyacid, ate, ic, ite, ous, printable, worksheet, interactive, puzzle, crossword, fuPage 14This unit includes atoms, elements, compounds, ionic bonds, covalent bonds, properties of water, macromolecules (structure, function, examples, CHONP), dehydration, hydrolysis, monomers, polymers, reactants/products, enzymes, and activation energy.Page 15This product contains 18 pages of multiple choice questions on intermolecular forces of organic compounds, properties of organic compounds, properties of ionic compounds and properties of metallic compounds (melting points, boiling points and solubility) from grade 12 chemistry. This also includes properties of alcohols, ethers, aldehydes, ketones, amines, amides, alkanes, alkenes, alkynes, aromatics, carboxylic acids and esters. These multiple choice questions are suitable to use for grade 12 cPage 16This download contains three Chemistry orientated bundle; "The Atom Word Wall Coloring Sheets (8 pgs.)", "Chemical Bonding w/t Atom and Molecule Word Wall Coloring Sheets (6 pgs.)" and "Six Types of Chemical Reactions Word Wall Coloring Sheets (6 pgs.)"The Science words in these three bundles are atom, ion, cation, anion, isotope, proton, neutron, electron, covalent bond, ionic bond, metallic bond, hydrogen bond, molecule, acid-base reaction, double replacement reaction, combustion, single replaPage 17This file is intended for honors, pre-ap, or AP chemistry. It includes teacher instructions, a student handout for 5 solubility rules, a student worksheet, and a key. Students have 40 problems. They determine if the ionic compound is soluble or insoluble using the rules, determine which rule(s) apply, and write the formula. It takes 30-60 minutes depending on the student and is appropriate as homework or as a cooperative learning activity. Keywords: chemistry, double replacement, precipitatPage 18This product contains 35 pages of short answer questions on bonding, Lewis structures, hybridization, resonance, periodic trends, electron configurations and quantum numbers from the orbitals and bonding unit in grade 12 chemistry. The topics include covalent compounds, ionic compounds, metallic compounds, polar bonds, non-polar bonds, VSEPR, sigma bonds, pi bonds, lone pairs, valence electrons, non-bonding electrons, molecule geometry, sp hybridization, sp2 hybridization, sp3 hybridization, spPage 19Chemistry Test Questions Mega Bundle contains 11 sets of test questions with over 1500 customizable questions in a variety of question types, including multiple choice, true or false, matching, diagrams, calculations, fill in the blanks, short and long answer questions! They cover atoms, ions & isotopes, covalent, ionic and metallic bonding, types of chemical reactions, stoichiometry, acids, bases & salts, rates of reaction, equilibrium reactions, and organic chemistry. Click on the indiPage 20This product contains 35 pages of short answer questions on bonding, Lewis structures, hybridization, resonance, periodic trends, electron configurations and quantum numbers from the orbitals and bonding unit in grade 12 chemistry. The topics include covalent compounds, ionic compounds, metallic compounds, polar bonds, non-polar bonds, VSEPR, sigma bonds, pi bonds, lone pairs, valence electrons, non-bonding electrons, molecule geometry, sp hybridization, sp2 hybridization, sp3 hybridization, spPage 21Use this word search as a unit introduction or review.★ 100 vocabulary words including:ACID, ALKALI, ALKALINE, AMORPHOUS, ATOM, ATOMIC, BASE, BOILING, BOND, CHANGE, CHEMICAL, CHEMISTRY, COLLOID, COMPOUND, CONDENSATION, CONDUCTIVITY, CORROSION, COVALENT, CRYSTAL, CRYSTALLINE, DENSITY, DIAGRAM, DIATOMIC, DOT, DUCTILE, EARTH, ELECTRICAL, ELECTRON, ELEMENT, ENERGY, EVAPORATION, FLUID, FORMULA, FREEZING, GAS, GROUP, HALOGEN, HEAT, HETEROGENEOUS, HOMOGENEOUS, INDICATOR, INTERNATIONAL, ION, IONIC, ISOPage 22Lecture Brand Spinach’s Advanced Chemistry1 Package features a higher-level chemistry curriculum for grades 9-12. Inside is a mix of lesson plans, work sheets, info sheets, visual diagrams, labs, quizzes, reviews and final exams. The package contains 14 distinct topic folders along with two exam folders. Topics include: Matter, Measurement, Atomic Theory, Names & Formulas, The Mole, Chemical Equations, Stoichiometry, Gas Laws, Electron Structure, Ionic Bonding, Covalent Bonding, Solutions, APage 23This 49-slide PowerPoint covers an introductory chapter for most AP Chemistry classes. It briefly overviews major concepts, such as types of aqueous reactions (gas-forming, neutralization, precipitation, and redox), the pH scale and calculating pH and [Hydronium] of strong acid solutions, molarity in stoichiometry & dilutions, as well as oxidation numbers and redox reactions. It also includes details like solubility rules, electrolytes, spectator ions, net-ionic equations, naming acids, &aPage 24These chemistry crosswords make wonderful vocabulary reviews for general chemistry or AP chemistry high school students This pack consists of five crossword puzzles related to bonding, chemical formulas, reactions and equations, stoichiometry, and redox reactions, plus an answer key. The crossword puzzles are: 1) Chemical Bonding (Lewis structure, single bond, molecule, hydrogen bond, nonpolar, bond, polar, hybridization, malleability, structural formula, resonance structure, dipole, VSEPR thPage 25This bundle contains 34 Grade 11 Chemistry Power Points with answers, 55 Chemistry Worksheets with answers, 10 Grade 11 Chemistry Tests with answers, 35 Grade 11 Chemistry Quizzes with answers and 2 Grade 11 Chemistry Final Exams with answers. Combined these products are 887 Pages long and are suitable to use for a grade 11 chemistry course.The topics covered are:Unit #1 Matter and BondingCalculating protons, neutrons, electrons and isotopic abundance, atomic radius, ionization energy, electronPage 26Vocabulary Cards, Assessments, Activities and Games for Ancient Greece!Vocabulary Cards – use as a word wall, matching game, sorting activity, a fun "Quiz, Quiz, Trade" game, or flashcards. The cards include 37 vocabulary terms, each with a brief description or definition, a visual representation, or both. Assessments: 3 Vocabulary Quizzes Terms include: Greece, peninsula, sea, mountain, sailor, ship, column, marathon, marble, sculpture, mosaic, theater, Olympic Games, myth, citizen, city-state
